**Dimensions (As Shown)**  
13W x 19H Inches  
33.02W x 48.26H cm

**Medium**  
Lithograph on Paper

**Edition**  
- Limited Edition of 1000  
- Numbered

**Custom Framing**

- Design-it-yourself and Save!
- Museum-Quality Framing
- Up to 50% off Gallery Prices

**Frame Your Artwork Online & Save!**

Did you know that you can custom frame this artwork to your exact taste and specifications. Spark your own creativity and frame your artwork in as little as 2 minutes in three easy steps! Our Online frame shop offers museum quality framing services at prices up to 50% off your local gallery or frame shop. [See art collection](#) .

**About Walt Disney**

The Walt Disney Company is one of the largest media and entertainment corporations in the world. Founded on October 16, 1923 by brothers Walt and Roy Disney as a small animation studio, it became one of the largest Hollywood studios and also owns eleven theme parks, two water parks and several television networks, including the American Broadcasting Company (ABC).

Disney's corporate headquarters and primary production facilities are located in California at the Walt Disney Studios.

The company is a component of the Dow Jones Industrial Average.

## Lithograph on Paper

This printing technique uses a planographic process in which prints are pulled on a special press from a flat stone or metal surface. The surface has been chemically treated so that ink sticks only to the design areas, and is repelled by the non-image areas. Lithography was invented in Germany in 1798. The early history of lithography is dominated by great French artists such as Daumier and Delacroix, and later by Degas, Toulouse-Lautrec, Picasso, Braque and Miro.

Based on the principle that oil and water repel, a Lithograph is created when an artist produces an oil-based or pen image on a stone or piece of metal. This surface is then moistened and covered with an oil-based ink. The resulting chemical reaction between the oil and water drives away the ink on the surface except where the drawing was first done. Fine quality paper is then placed against the surface and a lithographic press is used to create the print. Modern technology and processes have provided artists with many unique methods with which to create magnificent lithographs. In the 1890s color lithography became enormously popular with French artists, Toulouse-Lautrec most notably of all, and by 1900 the medium in both color and monotone was an accepted part of printmaking, although France and the US have used it more than other countries. George Bellows, Alphonse Mucha, Pablo Picasso, Jasper Johns, David Hockney and Robert Rauschenberg are a few of the artists who have produced most of their prints in the medium.

As a special form of lithography, the Serilith process is sometimes used. Serilith are mixed media original prints created in a process where an artist uses the lithograph and serigraph process. The separations for both processes are hand drawn by the artist. The serilith technique is used primarily to create fine art limited print editions.
