## About Lisa Audit

Lisa Audit is a Canadian artist born and raised in Marbleton, Quebec. She has loved to draw as far back as she can remember. With a supportive family behind her, Lisa nurtured her passion for the arts, drawing and creating new and innovative art, prints

and posters at an early age.

She went on to study graphic arts in college and upon graduation, Lisa Audit began designing for several well-known companies that produce wallpaper. Then she expanded her art, prints and posters into stationery, fabrics, and bathroom accessories.

Lisa Audit has worked from her home in Marbleton for the past twelve years. She values family life and quality time spent with her husband and two children. She often claims that some of her best art, prints and posters come from the inspiration provided by her daughter and son.

### **Offset Lithograph**

The offset lithography process works by first transferring an image photographically to thin metal, paper, or plastic printing plates. Unlike other forms of printing, the image on the printing plate is not recessed or raised. Rollers apply oil-based ink and water to the plates. Since oil and water don't mix, the oil-based ink won't adhere to the non-image areas. Only the inked image portion is then transferred to a rubber blanket (cylinder) that then transfers the image onto the paper as it passes between it and another cylinder beneath the paper.

The term offset refers to the fact that the image isn't printed directly to the paper from the plates, but is offset or transferred to another surface that then makes contact with the paper.
