Etching - Main Subject: Portrait

**Item Number**

8003672578

**Retail Value**

\$1,800

**ArtRev.com Price**

\$1,400

You Save 22% Off [-\$400.00]

**Dimensions (As Shown)**

6.5W x 8H Inches

16.51W x 20.32H cm

**Medium**

Etching

**Edition**

- Edition Size is Unknown

- Plate-Signed 

**Custom Framing**

- Design-it-yourself and Save!
- Museum-Quality Framing
- Up to 50% off Gallery Prices

**Frame Your Artwork Online & Save!**

Did you know that you can custom frame this artwork to your exact taste and specifications. Spark your own creativity and frame your artwork in as little as 2 minutes in three easy steps! Our Online frame shop offers museum quality framing services at prices up to 50% off your local gallery or frame shop. [See art collection](#) .

**About Rembrandt**

Rembrandt was a Dutch baroque artist who ranks as one of the greatest painters in the history of Western art. His full name was Rembrandt Harmenszoon van Rijn, and he possessed a profound understanding of human nature that was matched by a brilliant technique - not only in painting but in drawing and etching - and his work made an enormous impact on his contemporaries and influenced the style of many later artists. Perhaps no painter has ever equaled Rembrandt's chiaroscuro effects or his bold impasto.

Born in Leiden on July 15, 1606, Rembrandt was the son of a miller. Despite the fact that he came from a family of relatively modest means, his parents took great care with his education. School did not interest him, and he soon left to study art-first with a local master, Jacob van Swanenburch, and then, in Amsterdam, with Pieter Lastman, known for his historical paintings. After six months, having mastered everything he had been taught, Rembrandt returned to Leiden, where he was soon so highly regarded that although barely 22 years old, he took his first pupils, among them Gerrit Dou.

Rembrandt moved to Amsterdam in 1631; his marriage in 1634 to Saskia van Uylenburgh, the cousin of a successful art dealer, enhanced his career, bringing him in contact with wealthy patrons who eagerly commissioned portraits. In addition, Rembrandt's mythological and religious works were much in demand, and he painted numerous dramatic masterpieces such as *The Blinding of Samson*.

Because of his renown as a teacher, his studio was filled with pupils, some of whom were already trained artists. In the 20th century, scholars have reattributed a number of his paintings to his associates; attributing and identifying Rembrandt's works is an active area of art scholarship. In contrast to his successful public career, however,

Despite Rembrandt's financial success as an artist, teacher, and art dealer, his penchant for ostentatious living forced him to declare bankruptcy in 1656. An inventory of his collection of art and antiquities, taken before an auction to pay his debts, showed the breadth of Rembrandt's interests: ancient sculpture, Flemish and Italian Renaissance paintings, Far Eastern art, contemporary Dutch works, weapons, and armor.

Unfortunately, the results of the auction-including the sale of his house-were disappointing. These problems in no way affected Rembrandt's work; if anything, his artistry increased. His personal life, however, continued to be marred by sorrow, for his beloved Hendrickje died in 1663, and his son, Titus, in 1668. Eleven months later, on October 4, 1669, Rembrandt died in Amsterdam.

Rembrandt may have created more than 600 paintings as well as an enormous number of drawings and etchings. Not every early portrayal, however, can be interpreted as objective representation, for these pictures frequently served as studies of various emotions, later to be incorporated into his biblical and historical paintings. The self-portraits also may have served to demonstrate his command of chiaroscuro; thus, it is difficult to tell what Rembrandt looked like from such a self-portrait as the one painted about 1628 (Rijksmuseum, on loan from the Daan Cevat Collection, England), in which deep shadows cover most of his face, barely revealing his features. On the other hand, in none of these youthful self-portraits did he attempt to disguise his homely features.

## Etching

Etching is the process of using strong acid or mordant to cut into the unprotected parts of a metal surface to create a design in intaglio in the metal (the original process in modern manufacturing other chemicals may be used on other types of material). As an intaglio method of printmaking it is, along with engraving, the most important technique for old master prints, and remains widely used today.

In pure etching, a metal plate is covered with a waxy ground which is resistant to acid. The artist then scratches off the ground with a pointed etching needle where he or she wants a line to appear in the finished piece, so exposing the bare metal. The *echoppe*, a tool with a slanted oval section is also used for swelling lines. The plate is then dipped in a bath of acid, technically called the mordant (French for biting), or has acid washed over it. The acid bites into the metal, where it is exposed, leaving behind lines sunk into the plate. The remaining ground is then cleaned off the plate. The plate is inked all over, and then the ink wiped off the surface, leaving only the ink in the etched lines.

The plate is then put through a high-pressure printing press together with a sheet of paper (often moistened to soften it). The paper picks up the ink from the etched lines, making a print. The process can be repeated many times; typically several hundred impressions could be printed before the plate shows much sign of wear. The work on the plate can also be added to by repeating

the whole process; this creates an etching which exists in more than one state.

Etching has often been combined with other intaglio techniques such as engraving e.g. Rembrandt or aquatint e.g. Goya.
