

[La Melodie Acide \(A\)](#) by [Joan Miro](#)
Lithograph on Paper - Main Subject: Abstract

Item Number
8034872889

Retail Value
\$500

ArtRev.com Price
\$450
You Save 10% Off [-\$50.00]

Dimensions (As Shown)
10W x 13H Inches
25.4W x 33.02H cm

Medium
Lithograph on Paper

Edition
- Limited Edition of 1500
- Plate-Signed
- Numbered

Custom Framing

- Design-it-yourself and Save!
- Museum-Quality Framing
- Up to 50% off Gallery Prices

Frame Your Artwork Online & Save!

Did you know that you can custom frame this artwork to your exact taste and specifications. Spark your own creativity and frame your artwork in as little as 2 minutes in three easy steps! Our Online frame shop offers museum quality framing services at prices up to 50% off your local gallery or frame shop. [See art collection](#) .

About Joan Miro

Joan Miró, who was born in Barcelona in 1893 and died in Palma de Mallorca in 1983, left behind an important legacy which is included amongst the most original of the 20th century. His work, in general, would be marked with a clear surrealist tendency, where the realm of the memory and imaginative fantasy were to take priority.

He studied at La Lonja School of Fine Arts in Barcelona, and in 1918 set up his first individual exhibition in the Dalmau Galleries, in the same city. His works before 1920 (the date of his first trip to Paris) reflect the influence of different trends, like the pure and brilliant colors used in Fauvism, shapes taken from cubism, influences from folkloric Catalan art and Roman frescos from the churches.

His trip to Paris introduced him to and developed his trend of surrealist painting. In 1921, he showed his first individual exhibition in Paris, at La Licorne Gallery. In 1928, he exhibited with a group of surrealists in the Pierre Gallery, also in Paris, although Miró was always to maintain his independent qualities with respect to groups and ideologies.

From 1929-1930, Miró began to take interest in the object as such, in the form of collages. This was a practice which was to lead to his making of surrealist sculptures. His tormented monsters appeared during this decade, which gave way to the consolidation of his plastic vocabulary. He also experimented with many other artistic forms, such as engraving, lithography, water colors, pastels, and painting over copper. What is particularly highlighted from this period, are the two ceramic murals which he made for the UNESCO building in Paris (The Wall of the Moon and the Wall of the Sun, 1957-59).

It was at the end of the 60's when his final period was marked and which lasted until his death. During this time, he concentrated more and more on monumental and public works. He was characterized by the body language and freshness with which he carried out his canvasses, as well as the special attention he paid to material and the stamp he received from informalism. He concentrated his interest on the symbol, not giving too much importance to the representing theme, but to the way the symbol emerged as the piece of work.

In 1976 the Joan Miró Foundation Centre of Contemporary Art Study was officially opened in the city of Barcelona and in 1979, four years before his death, he was named Doctor Honoris Causa by the University of Barcelona.

Lithograph on Paper

This printing technique uses a planographic process in which prints are pulled on a special press from a flat stone or metal surface. The surface has been chemically treated so that ink sticks only to the design areas, and is repelled by the non-image areas. Lithography was invented in Germany in 1798. The early history of lithography is dominated by great French artists such as Daumier and Delacroix, and later by Degas, Toulouse-Lautrec, Picasso, Braque and Miro.

Based on the principle that oil and water repel, a Lithograph is created when an artist produces an oil-based or pen image on a stone or piece of metal. This surface is then moistened and covered with an oil-based ink. The resulting chemical reaction between the oil and water drives away the ink on the surface except where the drawing was first done. Fine quality paper is then placed against the surface and a lithographic press is used to create the print. Modern technology and processes have provided artists with many unique methods with which to create magnificent lithographs. In the 1890s color lithography became enormously popular with French artists, Toulouse-Lautrec most notably of all, and by 1900 the medium in both color and monotone was an accepted part of printmaking, although France and the US have used it more than other countries. George Bellows, Alphonse Mucha, Pablo Picasso, Jasper Johns, David Hockney and Robert Rauschenberg are a few of the artists who have produced most of their prints in the medium.

As a special form of lithography, the Serilith process is sometimes used. Serilith are mixed media original prints created in a process where an artist uses the lithograph and serigraph process. The separations for both processes are hand drawn by the artist. The serilith technique is used primarily to create fine art limited print editions.

Authenticity & Price Match Guarantee: Shop with confidence. ArtRev.com is proud to be the first online art retailer to offer a "[lifetime authenticity guarantee](#)" with every limited edition or original work of art. Most limited edition and original artworks ship with a Certificate of Authenticity free of charge. This certificate is an official and valuable document that most insurance companies require in order to insure artworks against damage or theft. ArtRev.com will make every possible attempt to match or beat the advertised price of any major Internet competitor, art gallery, or frame shop; given that they are authorized to sell the item from the publisher or artist, and have the exact item in stock available for immediate sale.

Pricing & Availability: Due to the dynamic nature of the ArtRev.com website, prices and availability are subject to change without notice. ArtRev.com is not responsible for any pricing errors.
