About Andres Orpinas

Landscape artist Andres Orpinas is extremely gifted and as a child he studied with the finest Chilean Artists until he entered the Academia de Bellas Arts in Santiago, Chile.

He arrived in the United States in 1962 where his work caught the attention of collectors. His brush projects beautiful color harmonies and delicacy with a rare distinction. His romantic landscapes are a gift he shares with his viewers; a place to enter as a sanctuary from today's busy lifestyle.

A number of his paintings are in print in limited and unlimited editions. He also has several sets of limited edition plates with the Franklin Mint and are distributed internationally.

Offset Lithograph

The offset lithography process works by first transferring an image photographically to thin metal, paper, or plastic printing plates. Unlike other forms of printing, the image on the printing plate is not recessed or raised. Rollers apply oil-based ink and water to the plates. Since oil and water don't mix, the oil-based ink won't adhere to the non-image areas. Only the inked image portion is then transferred to a rubber blanket (cylinder) that then transfers the image onto the paper as it passes between it and another cylinder beneath the paper.

The term offset refers to the fact that the image isn't printed directly to the paper from the plates, but is offset or transferred to another surface that then makes contact with the paper.
