About Salvador Dali

Whether working from pure inspiration or on a commissioned illustration, Dali's matchless insight and symbolic complexity are apparent. Dali is considered one of the top 5 artists of the past 100 years, along with Picasso, Chagall, Miro and Erte. Accomplished in all media, he was above all, a superb draftsman. His excellence as a creative artist will always set a standard for the art of the 20th century.

Salvador Felipe Jacinto Dali I Domenech was born at 8:45am on the morning of May 11, 1904, in the small agricultural town of Figueres, Spain. Figueres is located in the foothills of the Pyrenees, only sixteen miles from the French border in the Principality of Catalonia. The son of a prosperous notary, he spent his boyhood in Figueres and at the family's summer home in the coastal fishing village of Cadaques. His parents built his first studio in Cadaques. As an adult, he made his home with his wife Gala in nearby Port Lligat. Many of his paintings reflect his love of this area in Spain.

The young Dali attended the San Fernando Academy of Fine Arts in Madrid. Early recognition of Dali's talent came with his first one-man show, held in Barcelona in 1925. He became internationally known when three of his paintings, including the Basket of Bread (now in the Salvador Dali Museum Collection) were shown in the third annual Carnegie International Exhibition in Pittsburg in 1928.

The following year Dali went to Paris where he also held a one-man show. He also joined the Paris Surrealist Group. That same year Dali met Gala Eluard when she visited him in Cadaques with her husband, the French poet Paul Eluard. She became Dali's lover, muse, business manager, and chief inspiration. In 1934 Dali and Gala were married in a civil ceremony and made their first trip to America.

Dali emerged as a leader of the Surrealist movement and his painting, Persistence of Memory (1931) is still one of the best known surrealist works. But, as war approached, the apolitical Dali clashed with the Surrealists and he was expelled during a trial conducted by the group in 1934. Although he did exhibit works in international Surrealists exhibitions throughout the decade, asserting that: *le Surrealisme c'est moi*, by 1940, he was ready to move into a new era, a new type of painting with a preoccupation with science and religion - one that he termed *classic*.

Just prior to World War II, Dali and Gala fled from Europe, spending 1940-48 in the United States. The subsequent decades were very important years for the artist. The Museum of Modern Art in New York gave Dali his major retrospective in 1941. This was followed in 1942 by the publication of Dali's autobiography, *The Secret Life of Salvador Dali*.

In the years following 1949, Dali moved away from Surrealism and into his classic period and produced his 18 large canvases, many concerning scientific, historical or religious themes.

Among the best-known of these works are *Christ of St. John of the Cross*, in Glasgow, Scotland; *The Hallucinogenic Toreador* and *The Discovery of America by Christopher Columbus* in the Museum's collection; and *The Sacrament of the Last Supper* in the collection of the National Gallery in Washington D.C. Also at this time, Dali returned to the Catholic faith of his youth and he and Gala were married in a second ceremony in 1958, this time in a chapel near Girona, Spain.

In 1974 Dali opened the Teatro Museo Dali in Figueres. This was followed by retrospectives in Paris and London at the end of the decade. After Gala's death in 1982, Dali's health began to fail. It deteriorated further after he was severely burned in a fire in Gala's castle in Pubol, Spain, in 1984. Two years later, a pacemaker was implanted. Much of the years between 1980-89 were spent in almost total seclusion, first in Pubol and later in his private room in the Torre Galatea, adjacent to the Teatru Museo Dali.

On January 23, 1989, Salvador Dali died in a hospital in Figueres from heart failure and respiratory complications.

As an artist, Salvador Dali was not limited to a particular style or media. The body of his work, from early Impressionist paintings through his transitional surrealist works, and into his classical period, reveals a constantly growing and evolving artist. Dali worked in all media, leaving behind a wealth of oils, watercolors, drawings, graphics, sculptures, films, photographs, performance pieces, jewels and objects of all descriptions. As important, he left for posterity the permission to explore all aspects of one's own life and to give them artistic expression.

When I paint, the sea roars. The others splash about in the bath. Dali

Lithograph on Paper

This printing technique uses a planographic process in which prints are pulled on a special press from a flat stone or metal surface. The surface has been chemically treated so that ink sticks only to the design areas, and is repelled by the non-image areas. Lithography was invented in Germany in 1798. The early history of lithography is dominated by great French artists such as Daumier and Delacroix, and later by Degas, Toulouse-Lautrec, Picasso, Braque and Miro.

Based on the principle that oil and water repel, a Lithograph is created when an artist produces an oil-based or pen image on a stone or piece of metal. This surface is then moistened and covered with an oil-based ink. The resulting chemical reaction between the oil and water drives away the ink on the surface except where the drawing was first done. Fine quality paper is then placed against the surface and a lithographic press is used to create the print. Modern technology and processes have provided artists with many unique methods with which to create magnificent lithographs. In the 1890s color lithography became enormously popular with French artists, Toulouse-Lautrec most notably of all, and by 1900 the medium in both color and monotone was an accepted part of printmaking, although France and the US have used it more than other countries. George Bellows, Alphonse Mucha, Pablo Picasso, Jasper Johns, David Hockney and Robert Rauschenberg are a few of the artists who have produced most of their prints in the medium.

As a special form of lithography, the Serilith process is sometimes used. Serilith are mixed media original prints created in a process where an artist uses the lithograph and serigraph process. The separations for both processes are hand drawn by the artist. The serilith technique is used primarily to create fine art limited print editions.
